

$$(A + B) / 2 = 1/2 T$$

By Rudy Owens

Dec. 5, 2009

A and B is you and me.  
Divide by two, a point between  
Equals halfway there  
To a place called T.  
Tough to solve, that I swear.  
They're always best,  
The hardest tests.  
That what counts is never free.  
Just who said it comes easily.  
And Trust the Trickster  
Laughs loud and mockingly  
At those who don't succeed,  
Not quite reaching  
That spot called T.
